1. Academic Background

- Education:
  - 2024 – Ongoing: PhD in Ecology and Management of Forest Ecosystems, Université du Québec en Abitibi-Témiscamingue. Supervisors: Maxence Martin and Mélanie Roy. Thesis title : *Diversité, écologie et conservation de la fonge du sol des vieilles forêts boréales de l'est du Canada*
  - 2022 – 2024: Research Master's with thesis in Ecology and Management of Forest Ecosystems, UQAT. Supervisors: Annie DesRochers and Miguel M. Girona.
  - 2018 – 2021: Bachelor's degree in Biology of Organisms, Populations and Ecosystems, Université de Toulouse
- Employment:
  - Scientific and Cultural Mediator, Natural History Museum of Toulouse

2. Professional Experience and Leadership

- Awards and distinctions:

2025: Best oral presentation award, 5th Annual Canadian Fungal Network Symposium (100$)
2024 and 2025: Candidate selected by UQAT for the Force Avenir graduate personality competition
2024 and 2025: Candidate selected by UQAT for the NSERC Vanier scholarship competition
2024: PhD scholarship, UQAT (24 000$/4 ans)
2024: FRQNT, B2X doctoral research scholarship (100,000$/4 years), accepted
2024: FRQNT, PBEEE excellence scholarship for international students (66,667$), declined
2023: Sayona, UQAT Amos-Harricana Foundation, excellence scholarship (1,000$)
2023: UQAT, research contribution award (250$)
2022: UQAT, best oral presentation award
2022: UQAT, research contribution award (150$)
2022: ACFAS, jury prize "My thesis in 180 seconds" (250$)

- Relevant professional training:

2026-2027: Research internship in bioinformatics and statistical analyses of environmental DNA data on fungal communities in old-growth and ancient forests in the boreal zone and in France. Supervised by Antoine Brin, École d'Ingénieurs de Purpan (6 months)
2025: Participation au *Fungal Red Listing Workshop* at the European Fungal Conservation Congress, Uppsala, Sweden.
2025: Training in molecular biology applied to fungal taxonomy (18h), by Nicolas Van Vooren.
2025: Certification "Identifying and delineating Key Biodiversity Areas" (10h).
2025: IUCN Red List global and regional assessor certification (Red List Assessor Training) (14h).
2022: Research internship on Illumina sequencing of the soil mycobiome and DNA barcoding of dry herbarium specimens (2 months), Laurentian Forestry Centre, supervised by Christine Martineau, Marie-Josée Morency and Marie-Josée Bergeron.
2022: Professional training in science communication (module 101) (4h), with Sophie Malavoy, Association des communicateurs scientifiques du Québec.

2022: Professional training in scientific writing and communication in French and English (12h), Institut GRAMMATA.
2021: Research internship on the inventory of macrofungi, lichens and myxomycetes at the Borderouge Botanical Garden. Supervised by Olivier Puertas and Xavier Bossier.
2021: Research internship on the description of new species of the genus *Cortinarius* sp. from New Caledonia, UMR EDB, supervised by Monique Gardes, Patricia Jargeat, Hervé Gryta, Guillaume Eyssartier, Fabian Carriconde and Marc Ducousso.
2021: Research internship on the analysis of plastomes and plant genomes, UMR EDB, supervised by Guillaume Besnard and Pauline Raimondeau.

- Event, project or infrastructure management and coordination:
  - 2026: Lead organizer of a panel discussion (1h) on the global strategy for fungal conservation and genomics, COP17, Erevan, Arménie.
  - 2025: Lead organizer of a panel discussion (1h) on fungal conservation challenges at the IUCN World Conservation Congress, Abu Dhabi, United Arab Emirates, Canada Pavilion.
  - 2025 – Ongoing: President and co-founder of the non-profit organization Mycosphaera
  - 2025: Session moderator for *Forest Fungal Pathogens* et *Fungal Ecology & Evolution I* at the 5th Annual Canadian Fungal Network Symposium
  - 2023: Session moderator for *Lichen Biodiversity & Conservation II* et *A Fungal Perspective on Conservation and Citizen Science*, 4th Annual Canadian Fungal Network Symposium
- Committee participation:

2026 – Ongoing: Member of the Mushroom, Bracket and Puffball Specialist Group of the IUCN Species Survival Commission.
2026: Member of the Quebec delegation at COP17, Yerevan, Armenia.
2025: Member of the Quebec delegation at the IUCN World Conservation Congress, Abu Dhabi, United Arab Emirates.
2025: Member of the scientific committee of the 5th Annual Canadian Fungal Network Symposium
2023 – 2024: Student representative on the Diversity, Equity and Inclusion committee (2023) then on the education committee (2024) of the Mycological Society of America
2022 – 2025: Member of the intersectoral and interdisciplinary working group *Boréaliser* between UQAM and UQAT.
2022 – Ongoing: Member of the expert committee of the Consortium for Classification of Fungi and Fungus-Like Taxa
2022 – Ongoing: Student representative on the Master's program committee (2-year mandate) and the PhD program committee in Ecology and Management of Forest Ecosystems (3-year mandate), UQAT

- Editorial responsibilities:

2024 – Ongoing: Editor of the Fungal Systematics and Evolution (FUSE) series of Sydowia.
2025 – Ongoing: Co-editor of the special issue « *Fungal conservation, from knowledge to actions* » in Fungal Ecology.
2022 – Ongoing: Contribution to the peer review process of 12 articles in 8 journals.

- Knowledge dissemination and transfer activities:
  - Publications:

- 21 articles published in international journals and learned society journals (including 11 as first author), 4 book chapters, 1 correspondence in Nature, 1 Master's thesis, 2 macrofungal inventory reports, 2 newsletter articles, and 3 currently under revision. Totalling 846 citations, h-index = 11.
- 9 popular science articles, 6 press articles and open letters (+ 2 in press) and 2 press releases.

  - Conferences and posters:
    - 21 public and specialized lectures, 8 scientific posters and 31 radio, print media or podcast interviews.
  - Artistic or literary works:
    - Author of the narrative pieces *La Maison de Berry* et *Et si nous étions eux,* respectively, in the works *Boréaliser* et *Eskers* chez les Publications Zinc, ce dernier ayant reçu le prix « coup de cœur » Renaud-Bray.

- Supervision activities: Co-supervision with Maxence Martin of 4 undergraduate and Master's students, resulting in 3 reports and 1 scientific article currently under submission.
- Teaching and training activities:
  - Training of Office National des Forêts staff in eDNA data collection, MetaMyco project, France (October 2026).
  - Training of forest rangers in eDNA data collection, ORCHAMP project, Pyrenees, France (October 2026).
  - Lecture on fungal conservation (1h), Cégep de Sainte-Foy, bioecology program, Conservation Ecology course. March 18, 2026.
  - Lecture on ecological functions and ecosystem services provided by fungi in boreal forest territories in a sustainable forest management context (1h), Master en Bioéthique et Écoresponsabilité, Université de Toulouse. 9 mars 2026
  - Tutorials in lichenology and citizen science (6h), Bachelor's in Biodiversity and Environmental Biology, Université de Toulouse (KSVC5AFU Biodiversity of Fungi).
  - Lab practicals and mycological field trip assistant (4h + 18h), Bachelor's in Biology of Organisms, Populations and Ecosystems, Université Paul Sabatier (UE ELSVC5JM Biodiversity of Fungi).
  - Mycological field trip assistant (8h), Doctoral program in pharmacy, Faculté de Pharmacie de Toulouse (UE11.3 Common intoxications, addictions and pharmacy counselling)
